

What making better connections sounds like for you!

Livio AI intuitively connects to your Apple and Android devices via Bluetooth technology and Starkey's easy-to-use Thrive Hearing app. Thrive offers additional features designed to enhance your listening experience anywhere you go, and help you easily enjoy everything you do.

Body and Brain Health Tracking

Sensors are integrated into your Livio AI hearing aids so you can set daily wellness goals and easily track them via the Thrive app.

Language Translation

Easily communicate with people who speak other languages via the easy-to-use translation tool in your Thrive app. (Requires an internet connection.)

Remote Control

Using the remote control feature in the Thrive app, you can change volume and switch memories on your hearing aids right from your smartphone.

Personalized Memories

You can create multiple custom memories in the Thrive app by using any of the customize options.

You can even geotag memories. A geotagged memory will use GPS and cellular towers to recognize where you are and automatically adjust your Livio AI hearing aids when you enter that space. For instance, a geotagged "coffee shop" memory will automatically activate when you walk into your favorite coffee shop.

Auto Experience Manager

Automatically adjusts your Livio AI hearing aids' loudness over time to help you transition to your new hearing experience in the most comfortable way possible.

Apple Watch Compatible

Use the Thrive app for Apple Watch® to control volume, change memories and mute your hearing aids right from your wrist.*

Remote Programming

Request adjustments from your hearing care professional who can then make them remotely so you don't need to make an appointment and stop in.

Personalized Control

Make personalized, real-time adjustments to suit your preferences in different listening situations.

Phone Calls

Answer your calls with the touch of a button and hear an entire conversation streaming directly to your Livio AI hearing aids via Bluetooth® technology.*

Live Microphone

Simply set your smartphone nearby, turn on the microphone feature and stream conversations directly to your Livio AI hearing aids. You can also record, play back and email audio as it happens or save recordings to listen to later.

Siri Integration

You can have Siri® read texts and emails directly to your Livio AI hearing aids.**

Find My Hearing Aids

Easily locate lost hearing aids using the Find My Hearing Aids feature, with both a location and timestamp. A signal detector sends a stronger or weaker signal based on how close you are to locating your Livio AI hearing aids.

Real-Time Notifications

Notifications for phone calls, texts, emails or other apps can be streamed directly to your Livio AI hearing aids.

Adaptive Car Mode

With Adaptive Car Mode, Livio AI hearing aids will automatically change to a setting designed to reduce the annoying sounds of driving and enhance your overall driving experience.
